PROFILE SUMMARY

BS Information Technology graduate and Junior PHP/Laravel Developer with hands-on experience building full-stack web applications using Laravel, PHP, React, JavaScript, MySQL, PostgreSQL, and Supabase. Developed REST APIs, CRUD functionality, responsive interfaces, authentication, validation, and relational database features through academic and personal projects. Experienced in debugging, manual testing, defect documentation, Git, and GitHub.

TECHNICAL SKILLS

Backend: PHP, Laravel, REST API Development, Laravel Sanctum, Form Request Validation, Eloquent ORM

Frontend: HTML, CSS, JavaScript, React, Vite, Responsive Web Design, API Integration

Databases: MySQL, PostgreSQL, Supabase, SQL, Database Migrations, Relational Database Design

Testing: Manual Testing, Test Case Execution, Defect Documentation, Debugging

Tools: Git, GitHub, Visual Studio Code, Composer, npm, XAMPP

Additional: C#, C++, Java | Problem-Solving, Attention to Detail, Communication, Team Collaboration

PROJECTS

Student Subject Scheduling and Faculty Loading System

Full-Stack Developer | Laravel, PHP, MySQL, HTML, CSS, JavaScript

- Developed a Laravel and MySQL web system for student subject scheduling and faculty teaching-load management.
- Implemented CRUD operations, validation, role-based workflows, approval handling, and relational database features.
- Performed manual testing and debugging; received the Outstanding System Development Award in 2026.

Full-Stack Developer Portfolio - In Progress

React, Vite, Laravel 13, PHP, PostgreSQL, Supabase, Laravel Sanctum

- Building a React and Vite frontend with a Laravel REST API backend for presenting development projects.
- Connected Laravel to Supabase PostgreSQL and created the Project model, migration, API routes, controller, and Form Request validation.
- Using JSON responses, Sanctum-protected routes, Git, and GitHub for application development and version control.

GitHub: github.com/nickos8/developer-portfolio

RELEVANT EXPERIENCE

Information Technology Intern | Tanza Specialist Medical Center | 2025

- Executed manual test cases to verify system functionality, data accuracy, and consistency.
- Identified and documented software defects to support issue tracking and system quality.

EDUCATION

Bachelor of Science in Information Technology | Granby Colleges of Science and Technology | 2026

AWARDS & PROFESSIONAL DEVELOPMENT

- Thesis Project Symposium Presenter, Granby Colleges of Science and Technology, 2026
- Building the Future with AI: Data Analytics and AI Application Development Using Firebase, Seminar-Workshop Participant, 2026
- Next-Gen Automation: Blockchain, Networking, and Robotics, Seminar Participant, 2025

ADDITIONAL EXPERIENCE

Food and Beverage Staff | Villa Excellance | 2024

- Supported daily operations while maintaining service quality, cleanliness, accuracy, and customer service standards.

Service Crew | McDonald's, Tanza, Cavite | 2022

- Followed standardized procedures while maintaining order accuracy, service quality, and teamwork in a fast-paced environment.
